Attachment:	**Military Documents 4.zip;**

Many have also been recalled. There are some EUA complaint documents in the attached. Start by informing them you ain't taking no recalled, experimental test that cannot be mandated (poor diction intended).

If you do some basic research on these recalls you'll see many had deadly chemicals in them. No joke. That may be worth including as exhibits.

All available tests, to my knowledge, are EUA.

RE:

Notice to Employees Enrolled in COVID-19 Testing Program

Dear FEMA Employee,

Effective March 1, 2022, FEMA will require all employees, contractors, and official visitors who are not fully vaccinated, or do not wish to disclose vaccination status within the Vaccine Status System (VSS), to provide a negative COVID-19 test result within 24 hours prior to entering a FEMA facility.

Our records indicate that you either have not submitted proof of vaccination or have not provided an attestation of full vaccination in the Vaccine Status System (VSS) as of February 24, 2022. This message is notice of your automatic and mandatory enrollment in FEMA's COVID-19 Testing Program. If you are vaccinated, you are encouraged to update your status in VSS.

Employees are required to comply with established health and safety protocols, including mandatory COVID-19 Return to the Workplace Testing Protocols.

To comply with FEMA COVID-19 testing protocol, employees that are not fully vaccinated must:

- Obtain a negative COVID-19 test result within 24 hours prior to entering a FEMA facility, or have proof of 90-day testing exemption following COVID-19 diagnosis and recovery.
- Provide visual proof to your supervisor, facility entry screener, or designated test kit point-of-contact (POC) upon entering a FEMA facility.
    - Acceptable negative test results include pictures, screenshots, printouts, or medical documentation on official letterhead clearly indicating the name of the person, results of the test taken, the facilitator of the test, and date of testing.

Notice to Employees Enrolled in COVID-19 Testing Program

Dear FEMA Employee,

Effective March 1, 2022, FEMA will require all employees, contractors, and official visitors who are not fully vaccinated, or do not wish to disclose vaccination status within the Vaccine Status System (VSS), to provide a negative COVID-19 test result within 24 hours prior to entering a FEMA facility.

Our records indicate that you either have not submitted proof of vaccination or have not provided an attestation of full vaccination in the Vaccine Status System (VSS) as of February 24, 2022. This message is notice of your automatic and mandatory enrollment in FEMA's COVID-19 Testing Program. If you are vaccinated, you are encouraged to update your status in VSS.

Employees are required to comply with established health and safety protocols, including mandatory COVID-19 Return to the Workplace Testing Protocols.

To comply with FEMA COVID-19 testing protocol, employees that are not fully vaccinated must:

- Obtain a negative COVID-19 test result within 24 hours prior to entering a FEMA facility, or have proof of 90-day testing exemption following COVID-19 diagnosis and recovery.
- Provide visual proof to your supervisor, facility entry screener, or designated test kit point-of-contact (POC) upon entering a FEMA facility.
    - Acceptable negative test results include pictures, screenshots, printouts, or medical documentation on official letterhead clearly indicating the name of the person, results of the test taken, the facilitator of the test, and date of testing.
    - **E-mailing or texting of this documentation is prohibited.**

- Notify your supervisor and the FEMA Contact Tracing Team if a positive COVID-19 result is obtained. Employees who test positive will not be permitted access to a FEMA facility.

Test kits are available at no cost to individuals who have not provided proof of vaccination for the purposes of entry to FEMA facilities and those who require tests for official travel. Tests kits will be available at each facility's entry screening location or through the local Safety Officer.

Alternatively, employees may also obtain an approved third-party COVID-19 test from a physician, medical clinic, or hospital, if the results are on official letterhead with the name of the facility, the name of the physician or other licensed healthcare professional administering the test, results of the test, and date. Reimbursement for use of personal funds for third-party tests are not authorized, except for the limited circumstances as outlined by the Medical Evaluation Program.

As a reminder, vaccination is the strongest defense against COVID-19. If you wish to update your COVID-19 vaccination status, please use the Vaccine Status System (VSS). Search vaccines.gov, text your zip code to 438829, or call 1-800-232-0233 to find COVID-19 vaccine locations near you.

If you are physically deployed to a disaster location, please contact your Temporary Duty Supervisor of your mandatory testing requirements. They will then coordinate with the designated safety official to provide further guidance on the facility's specific testing protocols.

Failure to follow these entry screening procedures may result in disciplinary action.

For any additional questions, please contact FEMA-Medical@fema.dhs.gov.
